Parents angry at school's swine flu secrecy

Leaving a big record

National Register of Big Trees co-ordinator Derek McIntosh measures a massive poinciana on the Targo Street property of Mario and Annamaria D'Addario, on Mario's 80th birthday. The tree, which is over 100 years old, will be added to the database. Photo: MAX FLEET tre2907b

By CLEMENTINE NORTON

PARENTS are outraged after their children were kept in classes at Walkervale State School with a child who was confirmed to have swine flu. Amanda McGreevey said

parents had been kept in the dark by the school, after it failed to alert parents about the infection.

"Parents should have been notified immediately," Ms McGreevey said. Walkervale State School

deputy principal Mark Craswell said the school had followed Queensland Education procedures relating to swine flu, but would not comment further.
